

# SPEAKER

PROFESSOR ERIK VAN WOENSEL

Erik Van Woensel is the author of the book Classical Homeopathy - Evidence Based Medicine, Volumes I and II, including Case Studies, long term treatments and comparative clinical Materia Medica. Eric is also co-author with Professor George Vithoulkas (Alternative Nobel Prize 1996) of the book 'Levels of Health'.

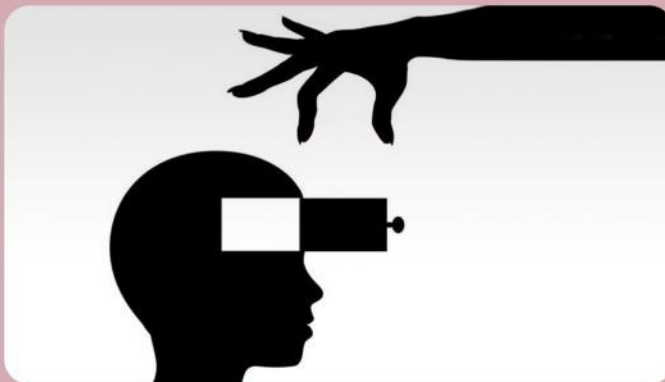

Erik is a classical homeopath who uses Professor Vithoulkas' methodology. He is an international disseminator of the 'Levels of Health' philosophy and founder of the 'Archive for Homeopathy' website, which was created to improve the practical application of homeopathy through the compilation of clinical cases.

Erik also advises and assists the team that develops the repertory Synthesis and lectures at international seminars. He has been the International Coordinator of the e-learning programme offered by the International Academy of Classical Homeopathy, led by Professor Vithoulkas.

Erik van Woensel is a homeopath of international renown with 35 years of experience; he is also a researcher and lecturer and is above all passionate about homeopathy. Erik has dedicated his career to the consolidation of excellence in homeopathy, and to its dissemination in a pure and scientific form.

VI CLASSICAL HOMEOPATHY SEMINAR

# COMPARATIVE MATERIA MEDICA

BARCELONA 2017

PROFESSOR  
ERIK VAN  
WOENSEL

AUTHOR OF THE BOOK  
'CLASSICAL HOMEOPATHY -  
EVIDENCE BASED  
MEDICINE

Methodology and rigour  
in the choice of a remedy

LESSER KNOWN  
REMEDIES

## LESSER KNOWN REMEDIES

Small remedies and not-so-small remedies, which are of great value despite their size. Erik van Woensel will review a wide spectrum of lesser-known remedies that we do not generally consider, even though they might resolve the case. This will include:

- Remedies with good MM information, which were frequently used in the past but are much less used nowadays for no particular reason. Examples include: Castoreum, Anantherum, Salicylicum acidum.
- Remedies which we use on the basis of some of their MM information, ignoring the rest of their MM information, even though it might produce good results, for example, the use of Anacardium in dermatology cases.
- Remedies we know well, where we have studied the MM, but where in practice the patterns of functioning are difficult to recognise even when the symptomatology is clear, such as Bryonia Alba in a chronic case.

## COURSE CONTENTS

Prof Erik van Woensel will provide a variety of tools which **make the remedy selection straightforward**. His teaching **makes complicated cases simple and clear**.

During the seminar, we will see **live cases** of extraordinary value, about whom Eric has not received any previous information, as illustrations of how to manage new patients with classical homeopathy.

*Simultaneous translation may be available, depending on demand.*
